Administration & Human Resources Management

Dear Ms. Skipper,

This letter regards Drexel Mixson who has served as our insurance agent and "Affordable Health Care" advisor. I have know Drexel for three years and have been involved in a business relationship for the past two years. His ethic in supporting our needs as a go between us and insurance carriers, his integrity to provide according to his promises, and his speed at returning calls and supplying information, has made our association both profitable and enjoyable.

For us, it would be an understatement to say we could not have navigated these unknown waters without him. Although we have insurance specialist with the Assemblies of God fellowship and used them for years to find appropriate policies for our needs, we found they had as many questions as we did in regards to the current health insurance climate.

Having a mixture of ages, genders and heath histories made it difficult for us to find a balanced offering of care which would provide for as many different needs as possible without ignoring any. After months of dissatisfaction with our then current carrier, it took Drexel only a few weeks to make himself aware of our needs and find appropriate answers. Since then, our needs and the insurance industry have changed and he has been proactive without being asked in preparing us for the next insurance season. He calls us with potential changes before they become potential problems.

Personally, you will find Drexel affordable and intelligent. He does not make me feel the lessor when he answers my questions or proactively plans for our future care. He explains his points simply and keeps both the bottom line and the safety net clearly seen. I feel more capable of making better choices with his advice leading me.
